IN THE CLAIMS:

1. (Amended) A multi-media system comprising:
- an input device for entering one or more program numbers of intended programs;
  - a receiver including a first digital interface, for generating a control command based on a program number received from said input device, and for transferring the control command in an asynchronous transfer mode via said first digital interface; and
  - a recording/reproducing device including a second digital interface, for decoding the control command transferred from said receiver, and for recording/reproducing a transport
